

AI-Generated Client Briefings

Team The Independent Variable — Standard Bank × Data School Hackathon 2026

Pre-meeting briefings for a Syn Bank coverage banker, written by a language model from figures computed by the wallet engine. The model is given an evidence block and instructed to reuse those figures verbatim; it never supplies a number of its own. Every output below was then re-read by `ai.llm.verify_grounding`, which flags any rand amount or percentage that did not appear in the evidence.

Shoprite Holdings (E09) — Consumer Goods

Rank 1 of 20 · estimated share 2.3% · annual fee opportunity R1,360M · largest gap in Transactional

Syn Bank currently captures R15.56B of Shoprite's estimated R663.23B addressable flow, representing an estimated 2.3% share of wallet. The primary opportunity is to aggressively target the R576.69B transactional gap to unlock an estimated R1.36B in annual fee revenue.

Key signals

- Transactional flow has increased by 43.7% over the last 90 days.
- The client currently processes 203,157 transactional items and 15,867 cross-border payments.
- Transactional services represent the largest uncaptured gap at R576.69B.

Recommended agenda

- Propose an integrated liquidity management solution to capture a larger portion of the R576.69B transactional gap.
- Discuss the 43.7% growth in transactional activity to identify specific operational pain points.
- Review the R39.10B trade finance gap to align our instruments with their current volume of 2,110 trade items.

Risk. The 23.0% decline in cross-border flow over the last 90 days requires investigation to ensure it does not signal a shift in procurement strategy.

BHP Group (E01) — Mining

Rank 11 of 20 · estimated share 13.0% · annual fee opportunity R393M · largest gap in FX

Syn Bank currently captures an estimated 13.0% share of wallet, leaving a significant R136.96B uncaptured flow gap. The primary opportunity lies in capturing the R69.82B FX gap to unlock an estimated R393M in potential annual fee revenue.

Key signals

- The uncaptured flow gap across all product pillars totals R136.96B.
- FX represents the largest uncaptured gap at R69.82B.
- Cross-border payment flow has declined by 15.3% over the last 90 days.

Recommended agenda

- Discuss strategies to migrate the R69.82B FX gap to Syn Bank to capture the associated R393M fee potential.
- Review the 15.3% decline in cross-border payment volumes to identify underlying drivers.
- Explore opportunities to increase the 1,314 trade instruments currently processed, given the 6.9% growth trend in trade finance.

Risk. The 15.3% contraction in cross-border flow suggests a potential shift in the client's international settlement requirements.

MTN Group (E16) — Telecoms

Rank 8 of 20 · estimated share 10.2% · annual fee opportunity R375M · largest gap in Transactional

Syn Bank currently captures an estimated 10.2% of MTN Group's addressable annual banking flow, leaving a significant R160.34B gap. The primary opportunity lies in capturing the R114.87B transactional flow deficit to unlock an estimated R375M in annual fee revenue.

Key signals

- The transactional flow gap stands at R114.87B, representing the largest uncaptured product pillar.
- Transactional volumes remain high at 211,227 items, despite a 1.2% decline in the 90-day trend.
- Trade finance activity shows positive momentum with a 33.1% increase in flow trend.

Recommended agenda

- Propose a review of the current transactional mandate to capture a larger portion of the R114.87B uncaptured flow.
- Discuss the 33.1% growth in trade finance to identify opportunities for increasing our share of the R2.65B trade gap.
- Address the 15.0% decline in cross-border flow to determine if this is a temporary shift or a loss of wallet share.
